Set up your GoAnimate account

- Beta URL: Go to <http://GoAnimate.com/willienelson>
- Click on the “Sign up” button in the main banner
- Set up a username and password
- You can start using the site right away
- GoAnimate will send you a confirmation email to activate the account for future login

GoAnimate Slideshow Application

- On the very top of the website, click on “Create”
- You reach a page showcasing GoAnimate’s different applications
- Mouse over and click on the first one of the left: SLIDESHOW
- On the next page you can choose between two different themes for your slideshow
 - The first one features Willie Nelson playing with bubbles while taking a bath
 - The second one is made of a random selection of animations featuring Willie Nelson and the other characters in his theme
- Our platform will automatically embed the pictures you upload into a randomly generated animated slideshow featuring Willie Nelson and fellow characters
- For each slideshow you can add Willie Nelson songs to accompany your pictures

Creating your Willie Nelson Slideshow

- Select one of the two slideshows available
- On the next page you can select the number of pictures you want in your slideshow. At the time of launch you can only choose a slideshow with less than 30 pictures
- It's then time to upload your pictures. We offer different ways to do so.
 - Your first option is to import pictures from your personal accounts on Facebook and Flickr
 - You can also choose to upload pictures directly from your computer
 - If this is not the first slideshow you create on GoAnimate, you can reuse pictures you uploaded before GoAnimate platform
- Once you imported all the pictures you want, you can organize their sequence and orientation
- It's then time to select a Willie Nelson song to go with it. We have 6 of his songs available
- And you're done! Add a title, select a thumbnail picture and we generate the slideshow for you
- You can try the application again. The resulting slideshow will be different every time
